CATERPAK

Sustainability

The latest trends in Food service show that there is an increasing demand for sustainable packaging solutions. Hence, caterers and food service players are looking for packaging that gives a local, urban, artistic, ultra-fresh look to the prepared foods.

Anchor Packaging is committed to offering a wide range of high quality, environmentally friendly disposable food packaging supplies. By sourcing biodegradable, compostable and sustainable materials, we are helping to reduce the carbon footprint within the Food Industry. From the manufacturing process all the way to the end-user, we are offering more sustainable product choices and awareness.

As a member of the **Australian Packaging Covenant Organisation (APCO)**, Anchor Packaging is committed to working towards Australia's 2025 National Packaging Targets.

By partnering with Anchor Packaging, our customers are joining a growing community of businesses making a commitment to improving the sustainability of their business practices.

We are more than just a Packaging Company.

Custom Printing

Our printing capabilities are world class. Over the years we have spent a lot of time developing our printing methods. We print using completely non-toxic inks.

Quality

We strive to provide you with the highest quality packaging that is not only affordable, but a future friendly solution to traditional food packaging.

Anchor Packaging is HACCP Certified in accordance with the standards of HACCP Australia Food Safety Certification

Systems - yet another demonstration of our commitment to providing safe, high quality packaging products.

Free Service

- **Free storage** in our warehouses, enabling us to ensure nationwide prompt delivery.
- **Development & design** of your custom branded packaging products from start to finish at no extra cost.

Online Ordering

Ordering has never been easier with our secure Customer Online Portal. Just log in, place your order and wait for your products to arrive.

Benefits of using the Customer Portal?

- Place orders and view past orders
- Create a 'favourites list'
- Request quotes on new products
- View up-to-date account information

Stock Management

Following the initial production lead-time for delivery of your custom branded product, we take complete control of your inventory management to ensure you never run out. Allowing you to sit back, relax, and focus on what's important to you and your business knowing we've got your packaging sorted.

Reliability

We have extensive warehousing and distribution capabilities, with warehousing facilities in Sydney, Melbourne and Brisbane to ensure your order gets delivered on time. Furthermore, our stock levels are meticulously evaluated to ensure items are always in stock and ready to be dispatched.

Have you ever wondered “What does Compostable actually mean”?

Here are some helpful Definitions

Biodegradable

“Biodegradable” means that a product will break down into carbon dioxide, water and biomass (fuel developed from organic materials) within a reasonable amount of time in a natural environment.

Recyclable

“Recyclable” is defined as products that can be recovered from the waste stream and converted into new raw materials to be used in the creation of new products or parts.

Made from Recycled Materials

“Made from recycled materials” are products whose content is made from industrial or post-consumer recycled materials that were recovered from a waste stream.

Composting in Australia

There are around 150 Industrial Composting and Organics Recycling facilities in Australia. Some councils provide composting facilities through their kerbside waste collections either through green organics and garden waste bin or through dedicated organic recycling service. To find a composter visit www.aora.org.au.

Compostable

“Compostable” products are biodegradable but with an added benefit of breaking down to release valuable nutrients into the soil, aiding the growth of trees and plants. These products must degrade within several months in an industrial composting facility and produces no toxic residues.

100% Compostable Pulp Food Packaging

What makes this the best Pulp on the market?

- Certified Compostable for both industrial and home composting (will even decompose in landfill or the ocean)
- 100% organic and responsibly sourced materials used in manufacturing process
- Holds shape with wet and greasy contents for longer (around 10 days)
- Microwave and oven safe - Can withstand temperatures of -20° C up to 200° C.
- Sabert manufactures both the bases and double lock lids, ensuring optimal lid fit and leak resistance.
- Unique styles and shapes to complement and not match current shapes on the market.
- Thicker and heavier gauge

Made entirely from Pulp

100% Certified Home Compostable

100% Certified Commercial Compostable

Suitable for hot & cold food

Microwave, oven & Freezer safe

HACCP Accredited

OUR PULP IS GOING PFAS-FREE!

PULP FIBRE PRODUCTS WITH NO INTENTIONALLY ADDED PFAS.

What are PFAS?

Commonly found in pulp food packaging to prevent the absorption of liquids and grease.

Long-term exposure to PFAS has been associated with potential health risks, including developmental effects, liver toxicity, and an increased risk of certain cancers.

It doesn't biodegrade in soil or water causing long-lasting contamination. PFAS are also known as "forever chemicals"

It's time to phase out PFAS! We are committed to producing PFAS-FREE pulp packaging!

Our PFAS-Free Pulp Solutions have the following features:

- Ideal for hot, cold, oily and saucy foods for takeout and delivery.
- Maintains integrity for up to two hours.
- Effective resistance to moisture, oil and grease in temperatures up to 65°C

HIGH-HEAT PULP PACKAGING

Sabert™ High-heat Pulp Packaging is a “ONE PACKAGE” solution for freezing to high heat application. Help reduce packaging costs and eliminate artificial materials to achieve high efficiency and lower costs.

Custom Printed Coffee Cups

Get your brand into the hands of your customers, literally. Custom branded coffee cups are a powerful and cost effective marketing tool for businesses. With custom branded cups, you are not only building awareness but also making your brand stand out from competition.

Why Choose Anchor?

1. Free in-house design
2. Warehouse and distribution
3. Simple payment methods available
4. Assistance with stock management to ensure you never run out!
5. We print using completely non-toxic soy or water based inks.

Need a Fast Turn-around?

Our locally made custom printed coffee cups can be ready **in 5 weeks**. Choose from our PE, PLA or Aqueous type coffee cups.

BetaEco COLD CUPS

RPET Cups & Containers made from Recycled PET

- BetaEco RPET is made from recyclable material – which means it has already been recycled and can be recycled again.
- BetaEco RPET will actually stay in the closed loop cycle because Australians are trained to recycle with plenty of access to yellow recycling bins around their homes and in public places. Once it reaches one of our MANY recycling facilities, it will become something else; a new playground or road tarmac.
- BetaEco RPET is a better value raw material than PLA.
- BetaEco RPET is a transparent, high visibility product.
- BetaEco RPET material does not have a shelf life of 90 days -so it will last if stored and is a much stronger product.
- BetaEco RPET will not melt in warm conditions if stored.

Recycled PET

Tamper Evident Containers

Post Consumer Recycled PET (rPET)

These containers are made from post-consumer recycled PET (rPET) to provide environmental benefits and meet customer demand for more sustainable food packaging. RPET plastic provides crystal clear clarity, enhances the look of product and increasing odds of impulse purchasing.

Superior

Unlike other containers that require a plastic tear-off strip, our container has no external pieces to throw away which makes for safer and smoother handling. The lock button tab fastens the top to the base of the container.

Uses

Tamper Evident containers are perfect for packaging a wide variety of products including cold pasta, fruit salad, leafy green salad, sandwiches, nuts, snack mixes, candy, desserts, and more. Ideal for delis, supermarkets and wholesale.

100% Post Consumer Recycled Material

Suitable for cold food

Strong & Durable

Reusable

HACCP Accredited
