# Get educated & make the best decision for an easy transition.

**Renewable** resources are made from resources that are grown sustainably and may also be a by-product of another process. Sugar cane pulp for example is a renewable resource and is a by-product of the crushing process to make sugar.

**Recyclable** products are those that can be commonly recycled through the recycling stream and waste management systems. Products that are recyclable and meet the Envirochoice brand are those that are already manufactured from recycled material, but can also be re-recycled.

**Compostable** products will biodegrade within a cycle of a compost process. The key difference between biodegradable and compostable is time. Not all biodegradable products are considered compostable because they may take longer to break down into biomass which consists of carbon, hydrogen and oxygen, also known as plant matter.

**Natural Fibre Bagasse** is a fibrous product that is a by-product of crushed sugarcane or bamboo, or recycled paper. Bagasse is used as a fuel for sugarcane and bamboo production, but there is an excess of bagasse after this use. The fibrous product is then pulped and moulded to form containers, plates and other packaging products.

**Australian Certified  
Compostable Products**

**EPI** technology gives polyethelene the ability to be degradable, biodegradable and compostable. An oxo-biodegradable additive allows the plastic to break down when exposed to UV light, heat and oxygen. Once the plastic has degraded into small pieces, with the presence of moisture and microorganisms, the plastic is then consumed and turned into biomass, making the product biodegradable and compostable.

**Ingeo** is a brand of PLA that we use to manufacture our PLA line of products. Ingeo performs much like traditional plastics, but are made from annually renewable resources like corn plants and is compostable and biodegradable. Ingeo is generally made from dextrose which is derived from field corn, this corn is not a food variety, but is instead grown for industrial purposes. Less CO2 emissions are produced whilst manufacturing an EPI product compared to traditional plastic products.

**PLA (polylactic acid)** is a material derived from starch. Starch can come from a variety of renewable resources including corn. **CPLA** is a copolymer PLA and withstands higher temperatures, thus more suitable for products exposed to high heats, yet is still biodegradable and compostable.

The Greener range is certified to the Flustix Plastic Free Mark. Whilst the AS 4736 – 2006 is the accepted standard in Australia, the product can still contain bioplastic, which is considered to be a form of plastic. Flustix Plastic Free certification does not allow the product to even contain bioplastics. Flustix Plastic Free certification is new to Australians and is ahead of its time in this market.

# COLD CUPS

## CLEAR RPET CUPS & LIDS

### PLASTIC BAN

NT (Council) : 1/01/2019
QLD : Proposed 1/09/2025
SA : Proposed 1/09/2024
TAS (Hobart) : 1/07/2021
WA : 1/10/2022

PET is the most recycled plastic in the world. Envirochoice cups contain recycled PET plastic, and can be recycled again too. PET also provides a strong cup with excellent clarity, ideal for frosty beers, bubbly ciders and nutrient filled, colourful juices. These cups can be used in conjunction with Capri PET dome lids and Capri PP Flat lids.

**EC-PET250 is NOT banned in NT**

# HEAVYBOARD ROUND CONTAINERS

Made with renewable resources, the Envirochoice Round Container provides an environmentally friendly alternative to foam soup cups. Used for chips, rice dishes, noodles, chicken strips and cold foods like frozen yoghurt too. "We've chosen to make a difference" tells your customers you're doing the right thing by the environment, but the plain design allows you to mark your brand on it with stamps or stickers if you choose.

# KRAFT CATERING TRAY & LID

**PLASTIC BAN**

**WA : Conditionally Banned  
1/09/2024**

These trays are strong, sturdy and are fully recyclable after use. To recycle the lid, you must remove the PET window from the Kraft lining, and put both in recycling separately. The bottom tray is also fully compostable too.

The trays and lids come in five varied sizes, which will fit almost anything you want! Each tray has a matching lid that can be secured with the closure tabs on each side. Suitable only for cold foods.

# BIN LINER

## PLASTIC BAN

A.C.T. : 1/07/2022

QLD : Proposed  
1/09/2024

SA : 1/03/2022

WA : 1/09/2023

### PLASTIC BREAKS DOWN BY SUNLIGHT OR HEAT !

This product is made possible by EPI's OXO-degradable additive technology. Exposure to sunlight or heat triggers a two-step degradation process, in which the plastic breaks down through oxidation into small fragments, which then degrades into the natural elements of carbon dioxide, water, biomass and minerals.

#### EC-BL1010 ●●●●
