# about **us**

Since 2008, Wild One's founders Andrew Lovric and Michael Gordon have done more than just create beverages.

They sparked a shift in the beverage industry, paving the way for healthy, organic, alternative beverages to shine among the big name competitors. Through their sheer passion and dedication to their craft, Andrew and Michael have carved their names into the beverages industry by making a positive impact with innovative, functional, healthy beverages with an outstanding product portfolio. Wild One has experienced 14+ years of growth and put smiles on faces of people all around the world, exporting to over 20 countries and servicing thousands of happy customers daily Australia wide.

With a strong, dedicated team our focus is always on how to best service customers and the environment. Our state of the art manufacturing facility located in our home of Wollongong operates on 100% renewable energy. We have implemented Cold Fusion Technology (CFT) at our facility, allowing us to offer long ambient shelf lives on all our products.

At Wild One we understand the importance of preservation and sustainability and that why we do our part. We carefully select only the highest quality ingredients locally in Australia and produce all our beverages in small batches to create the most interesting, refreshing and delicious flavours for the ultimate tasting and functional beverage experience.

Our team has over 50 years combined experience in beverage production and distribution and understand your needs and the needs of the consumer.
